

WE PLANT OUR FUTURE TODAY

Plant a Tree Project Introduction

ABOUT US

We are a team of highly motivated entrepreneurs who believe in their mission of creating globally as many new forests as possible. We already planted 6000 trees successfully and would like to keep going as far we can in numbers. Our planet's future is based on today's decisions. Together we can make it happen. Action is needed now.

OUR MISSION

WE HAVE ONLY ONE HOME, IT'S CALLED PLANET EARTH

Our goal is to plant 5 MILLION Trees worldwide in the next 3 years. To stop and turn around deforestation is the one of the most effective ways of a healthy ecosystem on Earth and to reduce CO2. Creating new forests is what we are assigned to DO, so our wonderful world can breath again.

Instead of useless gifts plant a tree.

If You would like to gift something special that is still there for You and Your beloved ones in 40-50 years, if You would like to give Your employees their own little superhero for clean air, if You would like to have a forest planted in the name of Your company, if You would like to visit that forest as team building so You are able to see what You created - JOIN OUR MISSION AND PLANT TREES. Give the Best Gift, the Gift of NATURE.

HOW DOES IT WORK?

Each and every single tree is planted under an individual's name or a company name. From each tree we take a picture and send it to the given email address. You will be able to see your name or your company name tagged on the little tree. We are able to plant twice a year due to our climate in Hungary, once in the springtime and once in the fall. We believe in professionalism so the trees are planted with a local agro forestry.

WHERE DO WE PLANT THEM?

The trees are planted on privately owned land, in Nyiradony. Our founder owns the piece of land and is under our protection. After soil examination we decide with expert what type of tree is the best. On our current land we plant oak trees. You can visit the land any time You would like to relax and see them develop from small trees to a beautiful forest. We would like to create this in many different locations with You support, so we can have a positive effect on climate change and we can show the amazing power of nature.

Thank You for being part of this long term green future of ours. Join us
and lets plant as many trees as possible. What we can give You is
transparency, honesty and better future with fresh air.

If You would like to Cooperate with us,
